

AUM GHANSHYAM VEKARIYA

Long Beach, CA - 90815 | +1 (562) 277-5369 | Software Engineer | Open to Relocation
aumghanshyam.vekariya01@student.csulb.edu | linkedin.com/in/aum-vekariya | aumvekariya.vercel.app

TECHNICAL SKILLS

Programming Languages:	Python, Java, C++, C, JavaScript, TypeScript, SQL
AI & Machine Learning:	PyTorch, TensorFlow, NumPy, Pandas, Scikit-learn, OpenCV, LangChain, Langfuse, Vector Databases
Backend & Distributed Systems:	FastAPI, Spring Boot, REST APIs, WebSockets, WebRTC, gRPC, GraphQL, Kafka, Redis
DevOps & Infrastructure:	Docker, Kubernetes, Jenkins, AWS (EC2, S3, Lambda, GPU), Linux
Frontend Technologies:	React.js, Next.js, Redux, Tailwind CSS, HTML, CSS
Testing & Version Control:	Playwright, Cypress, Jest, Postman, Git, GitHub
Databases & Cloud:	PostgreSQL, MySQL, MongoDB, Qdrant

EXPERIENCE

Software Developer | *Zluck Solutions — Surat, Gujarat, India* Mar 2025 – Sep 2025

- Owned end-to-end delivery of **6+** production features across backend and frontend (**Python/Node.js, React, REST APIs**), translating requirements into design, implementation, QA handoff, and release with measurable product impact.
- Drove performance improvements across **MySQL and MongoDB** by refactoring query paths, adding targeted indexes, and eliminating N+1 patterns, reducing **p95 latency by 25%** and stabilizing responsiveness for data-heavy, AI-assisted endpoints.
- Built lightweight AI-assisted workflow automation (classification, summarization, validation) by combining rule-based inference with service integrations, improving consistency of backend decision flows while reducing repetitive manual operations.
- Improved release safety and operational reliability by automating CI/CD and AWS integrations (**S3, Lambda**), strengthening code review standards, and adding structured logging/testing practices to accelerate iteration without regressions.

Machine Learning Intern | *KrtrimaIQ Cognitive Solutions — Bengaluru, Karnataka, India (On-site)* Dec 2024 – Mar 2025

- Built and deployed **LLM-driven academic content generation and evaluation services** using **FastAPI, LangChain, and OpenAI APIs**, automating assignment creation and essay/assessment scoring to reduce manual teacher workload by **45%**.
- Designed a secure, role-based **multi-stage assessment workflow** (Teacher → Reviewer → Institution Admin) using **JWT authentication and RBAC**, enforcing approval gates and auditability for multi-institution usage and policy compliance.
- Implemented **real-time AI evaluation** using **WebSockets** with retrieval via **Qdrant**, improving response latency and contextual relevance by **35%** by grounding outputs on curriculum-aligned passages and reducing off-topic generations.
- Automated **multilingual document generation** (Hindi/English) using **PyLaTeX/XeLaTeX** and prompt-tuned agents, producing consistent print-ready PDFs at scale while reducing formatting defects and manual classroom document preparation.

Software Developer Intern (Co-op) | *Zluck Solutions — Surat, Gujarat, India (On-site)* Dec 2023 – May 2024

- Shipped features and bug fixes across **4+** production web applications by implementing backend endpoints and UI changes with **Python, SQL, and JavaScript**, consistently meeting team standards for maintainability and code health.
- Strengthened correctness of business workflows by applying DSA-driven data transformations and edge-case handling, reducing failures in complex paths and improving behavior under invalid inputs and boundary conditions.
- Hardened API reliability by adding request validation, consistent error contracts, and request/response tests, reducing client-reported issues by **15%** and improving debugging speed through clearer failure modes.
- Executed in Agile sprints with Git-based collaboration and peer reviews, owning scoped deliverables from implementation through QA handoff while building disciplined practices around testing, observability, and release readiness.

PROJECTS

AI-Powered EdTech Platform for Academic Workflow Automation | Python · FastAPI · LangChain/CrewAI · Qdrant · WebSockets · AWS

- Built a curriculum-grounded RAG workflow in **FastAPI + LangChain + Qdrant** with real-time approvals over **WebSockets**, automating multilingual content generation and print-ready PDF delivery for academic operations.

Real-Time AI Voice Assistant for Sales Training | Python · WebRTC (LiveKit) · Whisper · GPT-4o · KokoroTTS · Docker

- Engineered an interruption-aware voice agent by streaming **STT → LLM → TTS** over **WebRTC (LiveKit)**, delivering low-latency turn-taking and persona-driven dialogue for realistic sales simulations.

LawGPT: Retrieval-Augmented Legal AI Assistant | Python · LangChain · Mistral-7B · FAISS

- Developed a legal RAG assistant using **FAISS** semantic retrieval and constrained prompting for **Mistral-7B**, producing IPC-grounded answers with traceable citations and reduced hallucination risk.

EDUCATION

California State University Long Beach Sep 2025 – May 2027
Master of Science in Computer Science Long Beach, CA

Coursework: Advanced Software Engineering, Advanced Algorithms, Distributed Systems, Advanced Artificial Intelligence, Pattern Recognition, Computer Vision, Object-Oriented Analysis, Programming Languages, Search Engine Technology.

Charotar University of Science and Technology Jun 2021 – May 2025
Bachelor of Technology in Computer Engineering Changa, India

Coursework: Software Engineering, Data Structures and Algorithms, Operating Systems, Database Management System, Blockchain Technology, Computer Networks, Internet of Things, Machine Learning, Artificial Intelligence, Network Security.
